SNF PEPPER AND QRP REPORTS & IMPROVING SECTION GG CODING: IT'S NOT THAT EASY!

WEBINAR: Nov. 9, 2022 • 1:00 – 2:15 p.m.

REGISTRATION: <https://education.njha.com/courses/47557>

FEE: \$99

CME, CNE, LNHA/CALA – 1.25 credits will be offered

Program for Evaluating Payment Patterns Electronic Reports (PEPPER) are a key source of information for skilled nursing facilities. They include provider-specific Medicare data for discharges and services vulnerable to improper payments. PEPPER can support a facility's compliance efforts by identifying where it is an outlier for these risk areas. This data can help identify both potential overpayments as well as potential underpayments. This presentation will review the target areas for PEPPER Reports for SNF, with particular attention to the changes under the SNF Patient Driven Payment Model (PDPM) that can impact the chances your facility is reviewed.

In addition, the session will examine quality reporting program changes and focus on critical areas and how to improve Section GG coding.
